

ONLINE LESSONS

for school groups

We bring the Chester experience to you, with our local teachers, who live in our charming city and have worked with us for many years.

During the booking process there will be a consultation about lesson content. The client will have choices about topic area, targeted vocabulary, target language production and grammar, according to the students' level.

Students participate virtually, either from their classroom or home.

How it Works

Live class via video conferencing.
Courses take place over 3-5 days.
Flexible format.

Usually 2x90-minute sessions per morning but time of day and duration can be adapted to suit the client and learners.

The maximum number of students will be negotiated during the booking process.

Resources and materials are hosted on the virtual platform
– students need only bring themselves and can join from classroom desktops, laptops or even from their personal mobile devices.

Methodology

Our focus is on task-based learning with lots of support, encouragement, and guidance by our professional, qualified and experienced teachers.

The sessions are based around natural and practical communication with plenty of opportunities for pair work and group discussion. Students explore a range of themes and targeted linguistic skills through varied and engaging activities with their peers, increasing their motivation.

Our experienced teachers' warm and welcome approach means students' confidence is developed and their linguistic skills improve, all whilst having fun!

Meet Some of our Teachers
