

VIRTUAL SCHOOL INTEGRATION

Virtual School Integration offers international students the opportunity to experience school life in another country and improve their English skills without needing to leave their homes.

Overseas students integrate into the community of a bustling British high school with an international links background. They are totally immersed in a natural environment facilitating spontaneous dialogue with native English speakers.

In this new world of changing work environments, an international mindset is of paramount importance. This programme connects students with like-minded peers – preparing them for a global and connected future.

An innovative way to explore culture and improve linguistic skills!

How it Works

Students communicate with a class of students in a British school in real-time via video conferencing using a bespoke online learning platform.

All information, resources and teaching materials are provided by the partner school.

One Click
Easy Access
No Hassle

“Our school is a hub of technology, innovation, and academic study with a globally minded approach to education.”

- Principle of our partner school

The School Morning

- Overseas students meet and get to know their English buddy (30 minutes)
- Students study together in a Lesson, including discussion groups and/or pair work with buddy (1 hour)
- Students partake in an activity with their buddy or teacher (1 hour)
- Students study together in a Lesson, including discussion groups and/or pair work with buddy (1 hour)
